

QUALITY POLICY

SOJAPROTEIN DOO BEČEJ as part of ADM company adheres to the principles of ADM's Global Quality Policy and product safety.

As one of the leading soybean processing companies in Europe, we are devoted to constantly improve our business by consistently applying Quality Management System and Food and Feed Safety systems, along with principles of sustainable product manufacturing.

Our goal is to be competitive on the global market and be recognized for processing solely NON-GMO soybean used for production of high quality, safe and thoroughly controlled products for human and animal nutrition.

We conduct all the ethical business practices in global supply chains, as affirmed by our SEDEX membership. Concurrently we understand and fulfill the requirements of Danube Soya organization, Kosher and Halal certifications.

We reach our goals through:

-  Reliable quality and health safety of our products, timely deliveries, optimal costs and minimal environment impact.
-  Acting like partner in all our business relations toward all subjects in food and feed production chains and all the relevant parties. Our aim is for all the subjects within our supply chain to accept the same obligations in terms of quality, product safety and services they are provide us.
-  Fulfilling the requirements and standards for managing quality, product safety, and also adhering to law regulations on all markets we have business in.
-  Growing Quality Culture and Product Safety by educating, training and encouraging awareness of our employees on all levels of their engagements.

Our mission and vision are achieved through collaboration, building trust, success encouragement & rewarding, all in best interests of our employees, business partners, engaged parties and community in its entirety.

We are team Sojaprotein.

Bečej, Maj 2024.
