

# Soya to be proud of

- where challenges meet solutions

**Sojaprotein** joined forces with **Donau Soja** - committed to making sustainability happen

Environmental sustainability and social responsibility! Sojaprotein - the largest soybean processor in Serbia - has more than 40 years of experience in the processing of Non-GM soybeans.

To verify its commitment, in 2021, full program of **food related Soy Protein Concentrates- (T)SPC is certified according to the Donau Soja/Europe Soya quality standards**. This confirms **fully traceable and controlled non-GM, deforestation- and conversion-free quality of soy product of European origin**.

Donau Soja/Europe Soya are standards of choice widely used by leading market players from all parts of the supply chain across Europe, who are shaping the future towards more sustainable and safe European protein supply. Standards are provided by international Donau Soja organisation ([www.donausoja.org](http://www.donausoja.org)).

## Quality matters

With our (T) SPC food related programme in certified Donau Soja/Europe Soya quality we can support you to improve your environmental footprint and sustainability performance.

In this journey, we offer you high quality products, controlled, certified and verified in:

- **Non-GMO quality**
- **Sustainability**
  - » **Deforestation- and conversion-free** via analysing satellite images using vegetation indexes
  - » **Reduced use of pesticides** (no use of hazardous and highly hazardous substances; no desiccation e.g., glyphosate, no aerial spraying)
  - » Production in line with EU **social and labour rights** and ILO standards
- **European origin and traceability**  
HARD IP - from the Danube Region/Europe via IT supported Traceability System with Isotope testing

Sojaprotein has just completed a detailed Life Cycle Analysis (LCA) of our food related (T)SPC program. Stay tuned, our CO2 results are coming soon!

**Our team is ready to support you with more information.**
